Aerospace Engineering (MS)
Distance Graduate Degree Program
Department of Mechanical and Aerospace Engineering

Program Description
Working professionals can now earn a thesis and non-thesis master's degree in aerospace engineering through Missouri S&T's distance education. The aerospace engineering program offers comprehensive graduate education in a wide variety of areas. Because of the inherent interdisciplinary nature of aerospace engineering, professionals working in non-aerospace engineering sectors may also benefit from the coursework offered as part of the distance master's of aerospace engineering degree program.

Credit Hours to Complete: The thesis degree requires a minimum of 21 credit hours of coursework and 9 credit hours of research. The non-thesis degree requires a minimum of 30 credit hours of coursework, up to 12 hours of which can be from out-of-department courses.

Course Length: 16 weeks (fall/spring); 8 weeks (summer).

Delivery Format: Courses are delivered over the Internet, via live streaming video; collaborative learning software includes WebEx and Blackboard; classes are archived online for review and easy access.

Course Management Software: Blackboard.

Admission Requirements
Bachelor's degree with GPA ≥ 3.0 or BS with GPA ≥ 2.75 (conditional admission) and GRE V+Q ≥ 302 (1100 based on old scale) and GRE AW ≥ 3.5. International students: In addition to bachelor's GPA and GRE requirements, TOEFL IBT ≥ 86 or satisfactorily complete an approved English Language Institute program. Applicants who have successfully completed a graduate certificate program from Missouri S&T are eligible for automatic admission into the aerospace engineering masters program and need not satisfy the above requirements.
